

TAC102 positional raw-read validation in *T. equiperdum* IVM-t1

Complete paired-end FASTQ scan; validated positional observations

TAC102 position	Reference	Validated observations	K	M	L	P	Other
653	K	268	3 (1.1%)	253 (94.4%)	—	—	12 (4.5%)
698	L	240	—	—	234 (97.5%)	3 (1.2%)	3 (1.2%)

Note: Percentages are calculated among validated positional observations, not conventional nucleotide sequencing depth or forma frequencies. The reference residues are K653 and L698.
